

Environmental and Sustainability Policy

„The greatest danger to our planet is the belief that someone else will save it.” (Robert Swan)

Environmental Statement

OUR ENVIRONMENTAL STATEMENT

At Hotel Doppio, sustainability and resource conservation are not just empty words—they are an integral part of our daily work. As a hotel in the Verkehrsbüro Hotellerie group and a member of Verkehrsbüro Hospitality, we are part of a large-scale, company-wide environmental management program. Through a wide range of measures and targeted initiatives across all areas of our hotel, we are making a significant contribution to its implementation.

In recognition of our commitment, we hold the Austrian Environmental Label for Tourism Businesses. This means that we not only adhere to existing measures but also regularly review them and continuously set new goals.

The following topics are important to us in this regard:

1 Management & Communication

Environmental awareness isn't just a top management issue! We involve all our employees, suppliers, and visitors in the implementation of our environmental policy:

- We communicate our measures and goals in writing, and our internal environmental team strictly monitors their implementation. We raise awareness of these through ongoing training.
- We practice environmentally friendly procurement by carefully selecting our suppliers in close collaboration with our corporate purchasing department, thereby involving our partners in our daily efforts to preserve a healthy environment
- We regularly review our energy, water, and chemical consumption figures as a basis for ongoing optimization.
- We incorporate environmental considerations and sustainability into new investment projects
- We take social responsibility seriously. In addition to a daily selection of freshly prepared breakfast options, our employees have the opportunity to enjoy lunch or dinner at the hotel. Furthermore, we offer a comprehensive range of training programs, initiatives to support work-life balance, and free on-site medical consultations as needed. We enable our employees to get involved in charitable initiatives and support tourism training centers through joint projects.
- We do not provide promotional gifts—unless they are verifiably regional or sustainable.
- Out of consideration for the health of our guests and employees, we operate our hotel as a smoke-free facility.
- Our hotel is accessible—for guests with limited mobility, we offer a room equipped to meet their specific needs. All public areas of the hotel (lobby bar, restaurant, event rooms) are accessible.

Environmental Statement

2 Resource Conservation

Conserving resources is a central focus of our environmental policy, because many of our raw materials are not available in unlimited quantities:

- We make an effort to conserve paper and reduce daily waste by
 - gradually switching to paperless office solutions in all possible areas.
 - using reusable containers whenever possible (food, beverages).
 - providing waste sorting systems in the hotel's public areas.
- In our showers, bathtubs, faucets, and toilets, we keep water flow to a minimum through water-saving measures.
- We are promoting the use of energy-efficient LED lighting in all areas
- We regularly clean and maintain our equipment in the hotel. Heaters with completely dust-clogged cooling fins or porous, cracked seals on the minibar lead to high energy consumption. By cleaning and regularly maintaining the equipment, we can combat these energy guzzlers. When making new purchases, we consciously choose energy-efficient appliances. Actively involving employees and guests in waste separation and the reuse of valuable raw materials

3 Environmentally conscious use of cleaning products and materials

- We have switched part of our cleaning supplies to an eco-certified ECO line. To reduce waste, we purchase these in bulk containers or refillable bottles.
- We avoid using single-use hygiene products whenever possible
- Both our bed linens and our pillows and blankets are certified organic and tested for harmful substances. Our linens supplier demonstrates its commitment to the environment through an environmental management system certification in accordance with the international ISO 14001 standard.

4 Improving Quality Through High-Quality Food

- To minimize waste, we avoid single-serving food packages whenever possible—subject to current regulations—and use reusable containers.
- When selecting food, we prioritize regional products. This allows us to avoid long transport distances and offer seasonal items.
- When purchasing food, we aim for a higher proportion of organic products and strive to continually expand our focus on regional items.
- Our food scraps are properly collected by organic waste disposal companies and converted into environmentally friendly energy using biogas plants.

Environmental Statement

5 Eco-Friendly Transportation

- The hotel is very well connected to public transportation, and we reward our guests for making a verifiably eco-friendly trip here.
-

6 A Look to the Future

- We continuously review, evaluate, and improve the measures listed above and document them in an action plan. Together with all our employees, visitors, partners, and suppliers, we are contributing to a better future.

If you have any other ideas—we'd love to hear them!

We hope you have a pleasant stay with us—one that will leave a lasting impression.
